SUMMARY

Passionate B.Tech IT student with a strong background in full-stack web development. Skilled in React, Vite, Firebase, JavaScript, HTML5, and CSS3, with hands-on experience building responsive web applications with authentication, real-time databases, and dynamic user interfaces. Excellent problem-solving, design, and collaboration abilities. Seeking a web development internship to create impactful and modern digital experiences.

EDUCATION

B.Tech – Information Technology

University College of Engineering, Nagercoil | CGPA: 7.54

Higher Secondary Education (Class XII)

CSI Matriculation HigherSecondary School, Nagercoil | 81.5%

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS3

Deep Learning Frameworks: React, Vite, TensorFlow, PyTorch, Keras, OpenCV, NumPy, Pandas

Backend & Database: Firebase,

REST APIs Tools: Git, VS Code, Jupyter Notebook, Google Colab, Arduino, ESP32

PROJECTS

Real Time Stray Dog Detection

Computer Vision Project

- Built a real-time stray dog detection system using YOLOv5 and COCO Dataset.
- Developed a real-time alert system for automatic stray dog detection and monitoring.
- Integrated AI-based object detection with live camera feed processing for improved public safety.

Real-Time Crowd Detection Using mmWave Radar

An IOT Project

- Developed a privacy-safe IoT crowd detection system using mmWave radar for real-time people detection and counting. Processed point-cloud data using Python and integrated Arduino
- Created a real-time web interface/dashboard for live crowd monitoring, alerts, and data visualization.

College Print Corner

Full-Stack Web Application

- Developed a responsive college print service web app using React, Vite, and Firebase.
- Implemented user authentication, real-time database/storage, and admin control features for managing print requests.
- Designed a mobile-friendly interface with reusable UI components for seamless document upload and print service management.

PlantShop

E-Commerce Web Application

- Developed an online plant shopping website with separate admin and customer interfaces using React, Vite, and Firebase.
- Implemented authentication, real-time database integration, and admin product management features.
- Designed a responsive user-friendly interface and deployed the application using Vercel.

CERTIFICATIONS

- **Python Data Structures** – Coursera / University of Michigan
 - **Digital Marketing Internship** – Sristi Innovation Educational Services, Techno Park
 - **AIML with Python** – Alric Info Tech, Trivandrum
-

RESEARCH & PUBLICATIONS

- iManager's Journal on Life Sciences – Published Paper "Personalized Medicine with AI: Unlocking the Human Microbiomes – A Review." DOI: 10.26634/jls.4.2.22346
-

AWARDS & ACTIVITIES

- 1st Prize – National Level Symposium – Paper Presentation: "The Role of Micro-Interactions in Web UX" – Dr. Sivanthi Aditanar College of Engineering, Tiruchendur.
- 3rd Prize – Inter College Symposium – Paper Presentation: "Real-Time Stray Dog Detection & Alert using YOLOv5 – University College Of Engineering Nagercoil
- Smart India Hackatho – Proposed AI-based "Smart Tourist Safety Monitoring & Incident Response System" with blockchain digital ID.
- TN Skills – Proposed A solution for Drainage blockage using Ultrasonic sensor, Water flow Sensor and vaccum Pump
- Paper presentation – National Level Symposium – Overcoming Challenges in Neuralink – Ponjesly College of Engineering Nagercoil
